

SHRIMP SET DUO is an expanded version of the Shrimp Set Smart set. We have improved the lighting unit to ensure the ideal growth of plants and emphasise the natural colours of aquarium animals. In addition, we have increased the size of the tank, maintaining the ideal proportions (35x35x40 cm). The set has been equipped with the high-capacity VERSAMAX 3 filter and a 50-W automatic heater.

SHRIMP SET DUO is ideal for setting up shrimp tanks and small plant aquariums as well as for keeping small fish. Thanks to its stylish design, it will fit perfectly into any modern interior.

VERSAMAX 3

- high filtration capacity - 1200 l/h
- filter media included
- does not take up space in the tank
- continuous performance adjustment
- easy access to filter media
- easy to clean
- large filtration surface

LEDDY SLIM DUO

Designed especially for freshwater aquariums, the lamp contains two rows of LEDs with a total power of 10 W (2x5 W).

The **SUNNY** diodes emit light which, being similar to natural sunlight, does not distort the natural colours of the tank interior. The **PLANT** diodes have been designed to suit the needs of aquatic plants and boost their growth.

COVER GLASS

The cover glass is equipped with the Smart Open system and contains a special cut-out for installing an external filter. Ensures safe and comfortable operation on a day-to-day basis.

COMFORTZONE FIX 50W

This maintenance-free, fully automatic electronic heater will ensure the ideal temperature of water.

AQUARIUM TANK

Carefully manufactured of 5 mm-thick glass of ideal proportions (35x35x40 cm, 49 litres). Glued together with transparent silicone, which gives it an exceptionally modern look.

PROTECTIVE MAT

Made of special foam, provides additional safety of operation and ensures thermal insulation of the tank bottom.
